4 Courses

Software Development Processes and Methodologies

Agile Software Development

Lean Software Development

Engineering Practices for Building Quality Software

Jun 11, 2023

Bui Ngoc Bao Tran

has successfully completed the online, non-credit Specialization

Software Development Lifecycle

The Software Development Lifecycle Specialization covers the process and practices used for software development. At the end of this specialization, the learner will be able to: 1.) Build high-quality and secure software using SDLC methodologies such as agile, lean, and traditional/waterfall. 2.) Analyze a software development team's SDLC methodology and make recommendations for improvements. 3.) Compare and contrast software development methodologies with respect to environmental, organizational, and product constraints.

Praveen Mittal
Adjunct Professor
College of Science and Engineering

Kevin Wendt
Director of Graduate Studies, Software Engineering
Department of Computer Science and Engineering

The online specialization named in this certificate may draw on material from courses taught on-campus, but the included courses are not equivalent to on-campus courses. Participation in this online specialization does not constitute enrollment at this university. This certificate does not confer a University grade, course credit or degree, and it does not verify the identity of the learner.
